THE BUILD SESSION · FOUNDING COHORT 01

STOP PROMPTING.
START BUILDING.

A private hands-on workshop. ChatGPT for thinking, Claude for building.

Saturday 24 October 2026 · 2 to 5 PM UK (2 to 5 PM Lagos) · Live on Zoom

TODAY

By 5 PM, you'll have built one working thing. Not watched me build it. You.

3
hours, mostly you building

2
hands-on build sprints

1
working build each, yours to keep

And a method you can use on Monday, without me.

HOUSE RULES

Four rules for today

1 One change at a time

Small changes are easy to check and easy to undo.

2 Stuck for 3 minutes?

Type STUCK and a screenshot in the chat. You jump the queue.

3 Camera optional

Your screen isn’t. Share it when it’s your turn.

4 It’s all in the kit

Prompts, links and help: workshop.motionplaylabs.com/kit

INTROS · 10 MIN

Who’s building what?

Your name, where you’re joining from, and your build in one sentence:

What it is **Who it’s for** **The one job it does**

Order: Alex · Henry · Eloka · Olaniyi · Adeoluwa

YOU'VE ALREADY USED IT

Everything you touched to get here was built in a conversation with AI

01
The application form

02
The review and approval

03
Your 24-hour payment link

04
Your receipt and confirmation

05
The Zoom invite

06
Last night's prep email

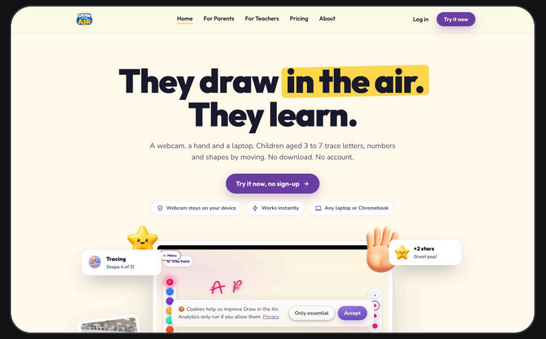

07
This deck

08
The kit in your chat

I'm a designer. I didn't write the code. I directed it.

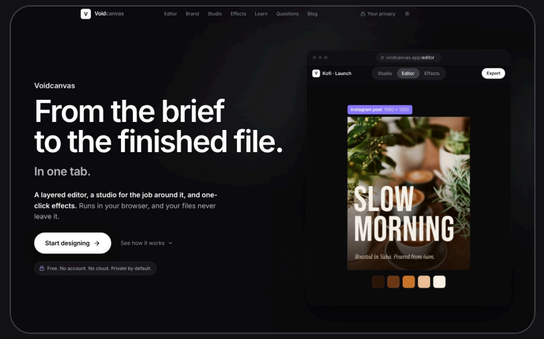

PROOF

Built with AI as my build partner

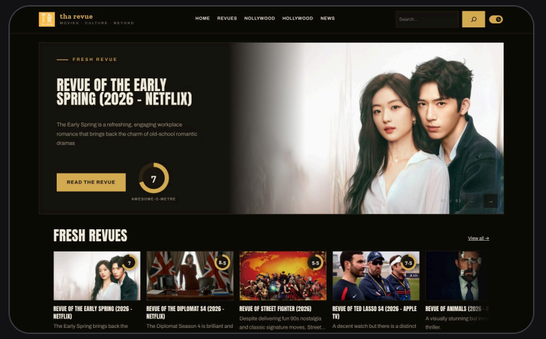

Draw in the Air

Kids learn letters by drawing in the air

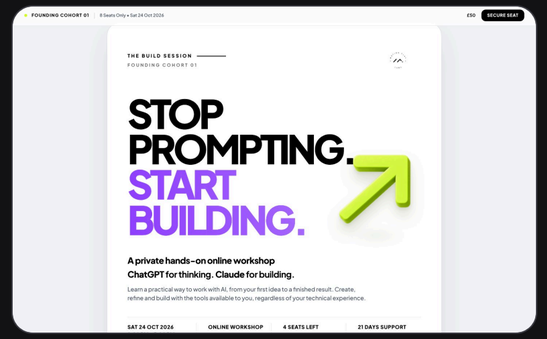

Void Canvas

A design studio that runs in the browser

Tha Revue

Nigerian film and TV reviews

The Build Session

The site, payments and emails you used this week

Same method every time. That’s the point.

THE REAL REASON

AI knows everything about the internet.
And nothing about you.

WHY YOU GET AVERAGE

Every gap you leave, AI fills with the average

YOU TYPED

```
Make me a website for
my food business.
```

IT HAS TO GUESS

- Who it’s for
- What it must do
- What to leave out
- The name
- The dishes and prices
- Where you deliver
- Your colours
- **What good looks like**

So it guesses the most common answer on the internet. **The AI isn’t the problem. The gaps are.**

TWO TOOLS, TWO JOBS

ChatGPT for thinking. Claude for building.

ChatGPT thinks

Interviews you and closes the gaps in a one-page Build Brief.

You judge

You sit in the middle and decide what’s good enough.

Claude builds

Takes the brief and builds a working page you can open.

Why two? So you finish thinking before you start building.

THE METHOD

Four steps, then save

1

Structure

In ChatGPT

Turn the idea into a brief

2

Direct

In Claude

The brief becomes a first version

3

Evaluate

You, not the AI

Test it against the brief

4

Refine

In Claude

Fix one thing at a time

Once per build

Loop 3 and 4 until it does the job

Then **save and share**, before you close the tab.

STEP 1 · STRUCTURE · PROMPT 1 IN CHATGPT

Don’t write the prompt. Let it interview you.

1
What it is

2
Who it’s for

3
The one job it does

4
Must have, 5 at most

5
Not now

6
Content: your real words

7
Look and feel

8
Done when

Each heading closes a gap. **Not now** keeps it to one afternoon. **Done when** is your test.

STEP 2 · DIRECT · PROMPT 2 IN CLAUDE

Prompt 2 turns the brief into a first version

```
Build this as one working page I can open in a browser.

Follow the brief exactly and use the real content in it.

Design it for a phone first, then make sure it works on
a laptop.

When you're done, list anything in the brief you couldn't do.

[paste your Build Brief here]
```

- One working page
- The brief, exactly
- Phone first
- What it couldn't do. That stops it bluffing.

STEP 3 · EVALUATE · YOU, NOT THE AI

Claude saying it’s done isn’t done.

- ✓ **1** It does the one job. Try it as the user.
- ✓ **2** Every Must have is there.
- ✓ **3** Nothing from Not now crept in.
- ✓ **4** All text is real. No placeholders, no made-up prices.
- ✓ **5** It works at phone width.
- ✓ **6** You’d show it to someone today.

If not, the one thing stopping you is your next Refine.

STEP 3, PART TWO · SECOND OPINION · PROMPT 6 IN CHATGPT

The AI that built it is the worst judge of it

PROMPT 6 · SECOND OPINION

```
You're a demanding client reviewing work you've paid for.
Here is my Build Brief and a screenshot of what was built.
List the 3 biggest problems, most important first.
Write each one as two lines, starting Now: and Instead:
Don't rewrite anything and don't write code.
[paste your Build Brief here]
[attach a screenshot]
```

- **Fresh eyes. It didn't build it, so it won't defend it.**
- **Answers come back as Now and Instead, ready for Prompt 3.**
- **You still decide which one matters.**

STEP 4 · REFINE · IN CLAUDE

One change per message

PROMPT 3 · REFINE

```
Change one thing.
Now: [what you see]
Instead: [what you want]
Keep everything else exactly as it is.
```

PROMPT 4 · FIX

```
Something isn't working.
What I did: [the steps]
What I expected: [what should happen]
What happened: [what actually happened]
[attach a screenshot]
Fix only this, then tell me in one line what
you changed.
```

Claude fixes what it can see. Always send the screenshot.

DIRECTING · YOUR REAL ADVANTAGE

Talk like an art director

A customer says	An art director says
“Make it look better”	**“Headline twice the size. Off-white background.”**
“Make it pop”	**“Order button lime, full width, fixed to the bottom.”**
“Make it more modern”	**“One font, more space, rounded corners on the cards.”**
“It’s not working”	**Prompt 4, with a screenshot.**

Vague feedback gets random changes. Specific feedback gets exactly what you asked for.

LIVE DEMO · 20 MIN

Mama Tee’s Kitchen

She cooks from home in Lekki and takes orders on WhatsApp. Forty people a day ask “how much is jollof?”

DONE WHEN

I add 3 dishes on my phone, see the right total, tap once, and WhatsApp opens with the order typed out.

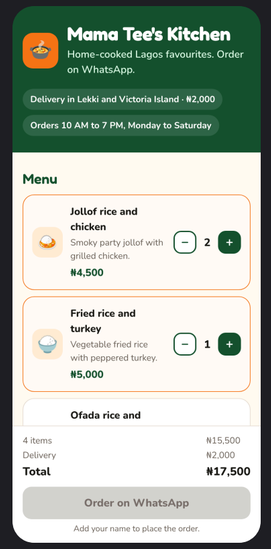

WHAT JUST HAPPENED

Same AI. Different input.

ONE SENTENCE

Make me a website for my food business.

Everything else, guessed.

FOUR MINUTES OF ANSWERS

Nothing guessed. Real dishes, real prices, one job.

The AI didn't get smarter. The input did.

SPRINT 1 · 25 MIN · 3:00 TO 3:25

Write your Build Brief

1. Open the kit: **workshop.motionplaylabs.com/kit**
2. Copy Prompt 1 into ChatGPT. Fill in the two brackets.
3. Answer with your real content. Every answer is a gap closed.
4. Paste your brief in the Zoom chat. Wait for “Approved”.

Don’t open Claude yet.

BREAK · 10 MIN

Back at 3:35.

Stretch. Water. Don’t open Claude yet.

SPRINT 2 · 45 MIN · 3:35 TO 4:20

Build it

1. Prompt 2 and your approved brief, into Claude
2. Run the six checks
3. Not sure what’s wrong? Prompt 6 in ChatGPT, with a screenshot
4. Fix one thing with Prompt 3. Repeat.

ROTATION

Alex · Henry · Eloka
Olaniyi · Adeoluwa

About 4 minutes each, two rounds. Share your screen when it’s your turn.

3:55: no working version yet? Switch to a fallback brief.

STUCK?

3 minutes stuck? Type STUCK and a screenshot.

If this happens	Say this, or do this
It changed things you didn’t ask for	“Undo that. Go back to the previous version and change only [the one thing].”
Made-up text or prices	“Replace all placeholder text with my real content: [paste it].”
You hit the free plan limit	Run Prompt 5. Carry on in a new chat with the hand-off note.
Code, but no page	Turn on code execution and file creation in Claude’s settings. Then: “Show this as a page I can preview.”

4:20 · SAVE AND SHARE · 15 MIN

Save it before you close the tab

1

Hand-off note

Run Prompt 5. AI forgets when the chat closes. This note is its memory, and you keep it.

2

Save the build

Use Share if you have it. Or ask Claude for the complete code as one HTML file. Save it as my-build.html.

3

Test it

Close the tab. Open your saved copy. Thumbs up in the chat.

4:35 · SHOW AND TELL · 20 MIN

Show us.

Four minutes each. Show it working. Tell us your one next step.

Alex Henry Eloka Olaniyi Adeoluwa

WHAT YOU REALLY LEARNED

You didn’t learn to build a page. You learned to direct AI.

- A booking page for your service
- A price calculator for your quotes
- A one-page pitch for an idea
- A quiz that matches customers to a product
- An invoice you fill in and print
- A landing page for your event

Same four steps. Pick one for your 21 days.

AFTER TODAY

Your next 21 days

Today

The WhatsApp group opens

Saturday 31 October

Group call: show what changed

Saturday 14 November

Final show and tell

Replies within 24 hours, Monday to Friday.

Ask with the template in the kit: what you're building, what you tried, what happened, what you want.

Thank you.
Go build the next thing.

Feedback: two minutes, link in the chat.
